

IK14

First group ever to use the electric guitar in this genre.

at the turn of the millennium they recorded for the label "Fridge Zone" the CD called "holiday in the universe", with great success in the drum & bass music.

Today, they return with a new line.

to MALIMA, guitarist founder of the group, to his playing atypical, based on effects and loops, you add the rhythm of drummer Dario MILAN.

Both make the songs centered on the loop composition, integrating them with a healthy dose of improvisation, human sensitivity, and an emotional charge intense and relentless.

It's the sound of the new millennium, a sort of "alternative-ambient-noise-dance" that makes the same sound as its main expressive force.

Dario Milan drums, compositions

Marino Peiretti guitars&noises/compositions
